Analyst with hands-on experience building end-to-end data pipelines, dashboards, machine learning models and performing market research as well as trend analytics to drive business insights. Proficient in SQL, Python, and Power BI, with expertise in ETL workflows, data validation, and real-time data processing. Proven ability to automate existing workflows,, improve data accuracy, and deliver actionable insights from large datasets from multiple sources.

SKILLS

- **Languages & Tools:** Python, SQL (PostgreSQL, Oracle), Power BI (DAX), Tableau, Excel
- **Data & Analytics:** ETL/ELT, Data Validation, KPI Development, Trend & Variance Analysis
- **Data Engineering:** Apache Kafka, PostgreSQL, Data Pipelines, Real-Time Processing
- **Machine Learning & AI:** Regression, Classification, NLP, Sentiment Analysis, LLM Integration
- **Other:** Dashboard Development, Data Visualization, Stakeholder Communication

PROFESSIONAL EXPERIENCE

Software Developer Intern | Data & Process Automation

Remote

Kloudtech Solutions

Dec 2025 – Mar 2026

- Built and maintained ETL pipelines using Python and SQL to clean and validate multi source datasets.
- Developed Power BI dashboards supporting internal and client-facing analytics.
- Deployed and monitored static web apps using Microsoft Azure.
- Automated data validation workflows, improving reporting accuracy and efficiency.
- Resolved data inconsistencies, ensuring reliability across reporting systems.
- Collaborated with cross-functional teams to align data outputs with business needs.

Business Analyst

Ottawa, Canada

Insight Weavers

Sep 2025 – Dec 202

- Generated weekly and ad-hoc reports using SQL and Excel for operational insights.
- Conducted trend and variance analysis to identify anomalies and performance shifts.
- Reduced stakeholder review time by 25% through structured reporting formats.
- Implemented data validation checks to ensure consistency and accuracy.
- Partnered with teams to translate business requirements into data insights.

Customer Support Executive

Noida, India

Tech Mahindra

Jul 2023 – Apr 2024

- Analyzed high-volume transactional data to identify recurring issues and root causes.
- Tracked issue trends and supported operational improvements through reporting.
- Documented workflows and defects to improve process consistency.
- Collaborated with technical teams to resolve data discrepancies.

Team Lead

Ottawa, Canada

Lambton College

May 2025 – Sep 2025

- Coordinated team schedules, project timelines, and deliverables for a \$25K initiative.
- Managed documentation, milestone tracking, and structured meeting updates across stakeholders.
- Prepared and presented organized summaries to technical and non-technical audiences.
- Improved project visibility and reporting clarity by approximately 15% through structured coordination.

PROJECTS

PaperSleuth – OCR & Analytics Automation Tool- [GitHub](#) | [Live App](#)

- Built an end-to-end data pipeline converting unstructured documents into structured JSON using Python.
- Implemented validation rules and error handling to ensure data integrity.
- Reduced manual document review effort by 40–55%.
- Designed outputs for audit, compliance, and analytics workflows.

- Converted unstructured data into actionable insights using NLP techniques.

HR Analytics & Workforce Reporting- [Project Link](#)

- Analyzed 1,500+ employee records to identify attrition and workforce trends.
- Built Power BI dashboards for reporting and decision-making.
- Improved data accuracy by 35% through validation processes.

PDF Querying System using NLP & LangChain - [GitHub](#)

- Developed an AI pipeline to analyze PDF documents using retrieval-augmented generation.
- Extracted key insights from legal and financial documents using NLP techniques.
- Automated document analysis workflows to improve review efficiency.
- Built a prototype interface for querying documents interactively.

Apple Product Market Research – Market Intelligence Dashboard

- Analyzed 10,000+ data points across multiple sources to identify a 30% decline in engagement.
- Applied sentiment analysis and trend modeling to uncover drivers of declining interest.
- Delivered insights to support product and marketing strategy decisions.

Real-time Market Dashboard - [GitHub](#)

- Designed a real-time pipeline using Apache Kafka, PostgreSQL, and Python.
- Processed 1,000+ events/hour with latency under 5 seconds.
- Enabled near real-time analytics and monitoring dashboards.

EDUCATION

Post Graduate Diploma in Business Analytics
Lambton College

Ottawa, Canada
Dec 2025

Bachelor of Computer Applications
Ambedkar Institute of Technology (GGSIPU)

New Delhi, India
Jul 2023

CERTIFICATIONS

- **Google Data Analytics Professional Certificate**
- **Lean Six Sigma White Belt**
- **Certified Scrum Master**
